1. The students should take at least two CS related courses every semester for the first year. You may withdraw the course once at most every year. CS courses include core courses or the electives from partner universities.

2. To avoid the stipend deduction, the students should complete 12 credits (4 courses in total) with B+ or above within the first year. By the end of the second year, complete another 6 credits (2 courses) with B+ or above.
   A. If the student’s performance is satisfactory, the stipend will be renewed for another year. Stipend deduction is NTD 6,000 for one non-passed course. The students who fail two or more than two subjects will NOT be recommended to enroll for the next academic year. The students will not be able to receive any stipend or funding from Academia Sinica or other government funding.
   B. By the end of second year, if one has completed/accumulated 18 credits with B+ in CS courses, the stipend will resume to 34000. However, if one passes the courses, but not yet complete 18 credits, the amount of stipend will remain the same. Otherwise, the students are not recommended to enroll and continue the study.

3. The student affairs committee reserves the right to decide the stipend amount.
